DUKE AVIATION

Maintenance Hangars with office , engineering & MRO facilities - Duke aviation limited

Proposed to be located at the MIHAN SEZ-Nagpur, as the next big infrastructure development for Indian aviation, the program prompted the need for state of the art aircraft maintenance services under one roof. These included servicing almost all types of commercial planes including giants like A380, B747-400, etc., in a plot area of 39.26 acres.

MRO facility for the Asian market, hence, making it a strategic destination. The facility was planned to cater painting, refurbishing,

The site was, also, neighbouring the new Boeings

manufacturing of spare parts, maintenance, warehouses, workshops and testing of aircrafts.

Based on the number of PEB structures with variable heights, the concept evolved to unify

them by means of an envelope to visually bind as a single facility within. A multi-storey

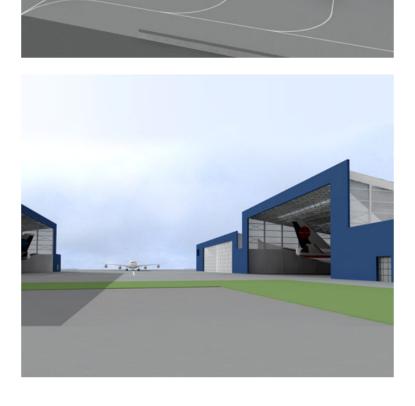

corporate block was located centrally at the rear portion of the complex surrounded with

landscape.
